

Features & Benefits

The headache of Super Choice compliance is removed with Reckon Tools SuperLink - the easy way to manage superannuation obligations. Reckon Tools SuperLink facilitates the transfer of information and payments between the customer, their employee, and employee Super funds.

Manage superannuation obligations

Reckon Tools SuperLink can help customers stay compliant and ensure contributions have reached the fund on time. Simply upload the details and SuperLink takes care of the rest – distributing information and contributions to each fund.

Save time and money

No more writing and posting individual cheques to each fund – this is all automated with Reckon Tools SuperLink. Customers can process the superannuation contributions during payroll – and it can take less than 5 minutes, no matter how many super funds are involved.

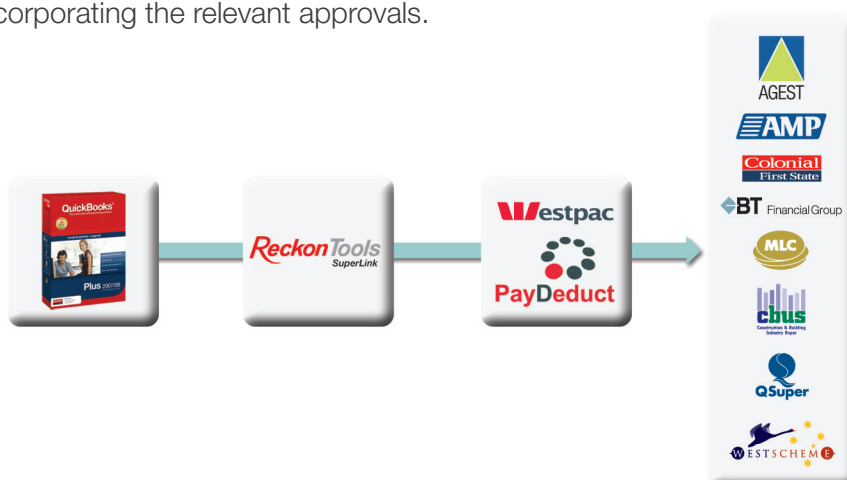

Seamless integration

SuperLink is integrated with QuickBooks® and Reckon Payroll Premier– which means customers can create pays, export them to SuperLink then go online to process the transaction.

How does it work?

The process is completely automated and once payroll data is imported into SuperLink there is no further human intervention, even for cheques which have a secure solution in place.

SuperLink currently connects to over 800 Superannuation funds. It connects to Self Managed Super funds incorporating the relevant approvals.

Pricing Guidelines

With Reckon Tools SuperLink you only pay for the employees that you have. The annual subscription cost is:

Number of Employees	0-5	6-10	11-20	21-50	51+
Subscription cost per year	\$110	\$165	\$264	\$440	\$825

Research indicates that the cost of writing a single cheque for an Australian small business is around \$15. This includes the time that it takes to write the cheque, the postage, the cost of the cheque itself and other incidental costs. Reckon Tools SuperLink removes the cost and hassle of writing cheques to meet your employee superannuation compliance obligations and therefore saves you time and money.

System Requirements

Recommended

- 1.0 GHz Intel Pentium IV (or equivalent) with 256 MB of RAM
